Automotive: on partnerships, alliances and M&A

Flirting. Courting. Engagement. Marriage. Divorce. Birth. Death. That's life. And that's life in the automotive sector too. Since motor cars appeared on the roads, great brands have come and gone. Some have disappeared for good while others were revived with mixed success.

In search for scale and market breadth, automotive groups have combined forces, but in most cases a few years later one had to conclude that the merger didn't work. Hence, some brands and smaller auto groups have changed owners several times. It is not our intention to give a detailed historical overview of mergers & acquisitions in the automotive sector, but as memories tend to be short, we give a few examples.

Back in 1994, BMW acquired the Rover Group, laying its hands on the Rover, Land Rover and Mini brands. Six years later, in 2000, Land Rover was sold to Ford, which combined it with Jaguar that it owned since 1990. BMW got rid of Rover, but cherished Mini as a means to tap the high-end small car market. The new-generation Mini went on sale in 2001 and about 3.8 mn units have been sold since. Failing to get a serious and profitable foothold in the luxury car space, in 2008 Ford sold Jaguar Land Rover (JLR) to India-based Tata Motors. Under the auspices of the Indian owner, JLR is being reinvigorated.

Investors that have been around for some time will certainly remember the problems Daimler experienced during its DaimlerChrysler period. And if they don't, Dr Jurgen Schrempp, who – after he became chairperson of the board in 1995 – realigned the group concentrating on cars and trucks, certainly will. In 1998, Daimler and Chrysler announced they were merging into DaimlerChrysler with the intention “to safeguard the long-term competitiveness of the companies involved.” The “marriage made in heaven”, as Dr Schrempp put it, did not exactly work out that way. On the contrary, it dragged the group down. In 2006, Dr Dieter Zetsche succeeded Dr Schrempp, and in 2007 Chrysler was sold to Cerberus, a private equity firm. Subsequent merger talks between Chrysler and General Motors ended abruptly and in 2009 both companies filed for bankruptcy. Fiat acquired a first stake in Chrysler in 2009, demerged Fiat Industrial in 2010, and entered into a full merger with Chrysler to form Fiat Chrysler Automobiles (FCA) in 2014.

Nissan Motor Company (NMC) was close to bankruptcy in 1999. DaimlerChrysler courted the Japanese automaker as NMC could open the doors to Asia. Yet, eventually the German-American group backed away. Enter Renault. Mr Louis Schweitzer,

Kristof De Graeve
Equity Expert

Editorial (2/2)

appointed CEO in 1992, had already cut costs quite drastically at Renault. Although the French car manufacturer still looked vulnerable, it bought a 36.8% equity stake in NMC and held warrant bonds to increase the stake to 44%. Mr Carlos Ghosn, deputy to Mr Schweitzer, was placed at the helm of the Renault-Nissan alliance. He presented and implemented the “Nissan Revival Plan”, soon became CEO of Nissan (which in 2001 bought, as foreseen, a 15% participation in Renault) and succeeded Mr Schweitzer as Renault’s CEO in 2005. Mr Ghosn has proven all sceptics – and they were aplenty – wrong: the alliance was successful. In its current form, it still is benefitting both Renault and Nissan. Even though we suspect a full merger could unlock value, we wonder if that really would be the case.

Maybe alliances and partnerships, not mergers, are the way to create value in the automotive industry. FCA CEO Mr Sergio Marchionne does not seem to think so. It was under his leadership that Fiat merged with Chrysler, and he has been urging for a further consolidation in the sector, openly flirting with General Motors since 2015. Peugeot does not seem to think so either as recently it bought General Motors’ bleeding European Opel/Vauxhall operations. The operations should allow for “substantial economies of scale and synergies in purchasing, manufacturing and R&D.” This comment fuelled speculation on an engagement between General Motors and FCA, although the former does not look as excited as it was earlier. FCA, however, looks eager to get married and, Mr Marchionne made clear to Volkswagen Group that FCA was ready to start dating. Maybe Volkswagen is just being polite, but it is “not ruling out a conversation.”

Despite the current anxiety around diesel emissions, we prefer Renault and its alliance partner Nissan. In our view, the Daimler stock too should outperform.

This document presents equity ideas exclusively provided for potential investments.

Focus: Basket of Stocks

Daimler (DAI-DE) – BUY – Target Price: EUR 73.00

Investment Case: Daimler has reinvented itself, putting emphasis on efficiency and rejuvenating and broadening its model range. This has led to volume growth, increased market share and margin expansion. We expect the group to continue on this path. The group is stepping up R&D in CASE), and it is also developing a new generation of internal combustion engines for MBC. Given the limited visibility on the truck market, Daimler's outlook is prudent despite a solid order intake in January both in the US and in Europe.

Main Risks: The auto industry is cyclical and highly competitive. The global truck market is highly cyclical with very limited visibility. Daimler is entering a period of slower growth. Higher costs due to more stringent regulation and heavy investments in new technologies will put additional pressure on profitability.

For a detailed analysis, please refer to the Daimler Equity Note, which can be found [here](#).

Nissan Motor Company (7201-JP) – BUY – Target Price: JPY 1 350.00

Investment Case: NMC's operating margin has recovered significantly since 2009 but is still well below the pre-crisis levels and the company target. Its market share too is still below the stated objective. We believe there is scope to grow unit sales and revenues, while cost management should improve profitability. The North American market is very important, but NMC has a sound exposure to emerging markets. Its product portfolio is well-diversified, which should improve the product mix. The partnership with Mitsubishi Motors should yield broad-based synergies.

Main Risks: The automotive industry is highly cyclical and fiercely competitive. The North American market has peaked, incentives are increasing and used-car prices are declining. A slowdown in China may hurt profits and weigh on investor sentiment. The MMC acquisition may be risky. Forex may significantly impact NMC's competitiveness and profitability.

For a detailed analysis, please refer to the Nissan Equity Note, which can be found [here](#).

Renault (RNO-FR) – BUY – Target Price: EUR 98.00

Investment Case: The Renault–Nissan Alliance brings significant synergies. While a full Renault–Nissan merger is not on the cards in the short term, we believe it would create additional value. Partnerships with Daimler and Bolloré create economies of scale, accelerate growth in new regions and help fund R&D. Renault's FY17–22 strategic plan appears ambitious but realistic (plan details will be presented in October). We expect its key focus areas to be emerging markets, platform and module strategy, and electric vehicles.

Main Risks: The automotive industry is highly cyclical and competitive. The value investors assign to the Renault stub varies over time, as does the applied discount. Renault's diesel models are under investigation in France. Although the group denies fraud, press reports on the subject could still cause share price volatility.

For a detailed analysis, please refer to the Renault Equity Note, which can be found [here](#).

Convictions Highlights

The EM Conviction List fell 1.1% last week, underperforming the MSCI EM Index, which lost 0.7%. Bangkok Bank was the week's worst performer as it declined 2.2%, while Alibaba Group was the best performer as it added 0.8%.

MSCI Emerging Markets Index (USD)

Macroeconomic Views

South Korea: Consumer confidence rises in March

South Korea's consumer confidence rose to 96.7 in March from 94.4 in February. Consumer confidence stood at five-month high, helped by improvement in expectations for the economic outlook over the next six months to 77 from 70 in February. All components gained, barring prospective household spending which was flat at 104.

South Africa: Inflation rate meets expectations in February

South Africa's consumer prices increased 6.3% YoY in February, in line with expectations and following a 6.6% gain in January. It was the lowest inflation rate since September 2016, as prices rose less for food and non-alcoholic beverages and household contents and services.

Rating System

Investment Rating Definitions:

Buy	Stock that is expected to outperform its MSCI sector index over a 12-month investment horizon.
Neutral	Stock that is expected to perform in line with its MSCI sector index over a 12-month investment horizon.
Sell	Stock that is expected to underperform its MSCI sector index over a 12-month investment horizon.
Restricted	Covered stock that is not rated or assigned a target price as the Societe Generale group has a capital market transaction with that company.

Product Risk Rating

The product category of single equity, stock, share is rated at '4'.

In order to draw the attention of potential investors to the risk linked to each investment solution, Societe Generale Private Banking has ranked each product according to its own specific risk scale from the lowest risk (class 0) to the highest risk (class 4). The risk classification is a Societe Generale Private Banking internal risk indicator. These internal indicators are based on the Value at Risk 95% 1 year (VaR). The VaR corresponds to the maximum amount that the portfolio being considered could lose in normal market conditions over a given period with a given probability (past performances and simulations of performance shall not be considered as a reliable indicator of future performance). If the VaR 95% 1 year is y%, this means that there is a 95% probability that the portfolio will not lose more than y% of its value in one year.

Risk Levels

Losses

0 - Lowest Risk	There is a 95% probability that the product will not depreciate in value in one year.
1 - Low Risk	There is a 95% probability that the product will not lose more than 5% of its value in one year.
2 - Medium Risk	There is a 95% probability that the product will not lose more than 15% of its value in one year.
3 - High Risk	There is a 95% probability that the product will not lose more than 30% of its value in one year.
4 - Highest Risk	There is a minimum of 5% probability that the product will lose more than 30% of its value in one year.

Calculation Methodology

Performance Calculation

At the time of inception of the conviction list, all members are based at 100. Each stock is equally weighted, so that every member has the same probability to add value to the list. The selection is made using a bottom-up approach and may not be read as a portfolio construction.

Performance of Conviction Lists and the members is calculated every week based on Monday's closing price or last trading day in case of a holiday. Rebased level for Conviction List members is obtained by applying the change in the share price (current price/last week price) to the previous rebased level. Rebased level for the Conviction Lists is obtained by averaging the rebased levels for all the conviction list members.

Conviction List Change

Performance is also calculated as mentioned above at the time of any change in Conviction Lists such as inclusion of a new member or removal of an existing member. For inclusion or removal of a member, closing price on the day prior to the announcement is used. In addition, all members are equally weighted again by applying the last rebased level of the Conviction List.

Performance Measurement

Weekly: % change in the current rebased level over previous week's rebased level.

YTD: % change in the current rebased level over the rebased level at the beginning of the year.

Since inception: % change in the current rebased level over the base value (100).

Since inclusion (Conviction List Members): % change in the current rebased level over the rebased level at the time of inclusion.

Potential Upside Calculation

Of Members: is obtained by ascertaining the % difference between the current price and target price.

Of Conviction Lists: is obtained by rebasing the upside potential of members and then averaging these rebased upside potential levels.

Corporate Actions

Dividend payment : the performance methodology does not take into account the impact of dividend payment. Therefore, the lists' performance is purely based on price return calculation.

Stock Split : to adjust the effect a stock split, we adjust the target price by the same ratio as that of the stock split.

Benchmarking

Performance of Conviction Lists is compared with the following relative benchmarks to ascertain the outperformance/underperformance

Global CL (Conviction List) : MSCI AC World

Developed Asia-Pacific CL : MSCI AC Asia Pacific

European CL : MSCI Europe

US CL : S&P 500

Emerging CL : MSCI Emerging Markets

Dividend CL : MSCI World High Dividend Yield

Glossary (1/2)

Societe Generale Private Banking Investment Universe

Societe Generale Private Banking defines and maintains an investment universe, aiming at ensuring the liquidity and the meaningful coverage of companies subject to potential investments. This investment universe complies with rules defined as follows:

- **Issuers are constituents of MSCI indices:** The constituents of the indices retained cover developed and emerging countries with increased precision (average market capitalisation) for Germany, Belgium, France, the UK and Switzerland.
- **Market Capitalisation:** To avoid the inclusion of securities whose market capitalisation could be too low in light of the potential investments by clients and/or managers, only securities whose market capitalisation is greater than €500 mn have been chosen.
- **Liquidity:** To ensure minimum liquidity for investments, only securities with a six-month average daily trading volume greater than EUR 300,000 are selected.
- **Reliable Financial Information:** Only securities tracked by at least three sell side financial analysts are included in the universe.
- **Social and Environmental Responsibility Policy of SG Group:** Societe Generale has defined a framework for Social and Environmental Responsibility. This framework sets out restrictions on listed securities identified by SG Group and deleted from the universe.

Societe Generale Private Banking Recommended Universe

The Recommended Universe is made of companies from the Investment Universe as defined by Societe Generale Private Banking guidelines. Members are chosen by Equity Solutions. There are no lower nor upper limits on the number of stocks in the Recommended Universe. There is no specific constraint in term of geographical or industry representation. A company from the recommended universe can be subject to a rating change, as decided by the Equity Solutions expert covering the company. When a stock is downgraded to a Sell rating, it is still followed for at least 3-month, after which Equity Solutions issues a coverage termination alert.

Financial Terms and Acronyms

ADR (American Depositary Receipt): is a negotiable certificate issued by a US bank representing a specified number of shares in a foreign stock that is traded on a US exchange. ADRs are denominated in US dollars, with the underlying security held by a US financial institution overseas.

BACKLOG: often refers to a company's sales orders waiting to be fulfilled. Even if it provides the revenue visibility, the companies usually try to avoid to have an extensive backlog because that creates the risk of unmet demand and thus can have negative impact on future earnings

BENCHMARK: is, generally, a broad market, market-segment stock or bond index that is used as a reference to evaluate the performance of a security, mutual fund or investment manager.

BV (Book Value): is the total value of net assets of a company. It consists of the firm's fixed assets plus its current assets, minus short-term liabilities, long-term creditors and any provisions.

BV/S (Book Value Per Share): is the total value of the net assets of a company divided by the total number of outstanding shares.

C/I (Cost Income Ratio): is used for valuing banks. It shows a company's costs in relation to its income. Formula: $(\text{Operating Costs}/\text{Operating Income}) \times 100$.

CAGR (Compound Annual Growth Rate): is a term used for the geometric progression ratio that provides a constant rate of return over a specific time period.

CAPEX (Capital Expenditure): is the fund used by the company to acquire or upgrade the physical assets such as property, industrial buildings or equipment. The most capital intensive industries include oil, telecom and utilities.

CAR (Capital Adequacy Ratio): is a measure of a bank's capital. It is expressed as a percentage of a bank's risk-weighted credit exposures. Formula: $(\text{Tier One Capital} + \text{Tier Two Capital})/\text{Risk Weighted Assets}$.

CET I (Common Equity Tier I Ratio) : is a measure of the bank's common equity capital as a percentage of risk-weighted assets. It is generally compared to a defined benchmark stipulated by the regulatory authority to determine whether a bank is sufficiently capitalised.

DIVIDEND YIELD: Dividend per share or DPS (total dividend paid out divided by the total number of shares) expressed as a percentage of current stock price.

EBIT (Earnings Before Interest and Taxes): profit before taking into account interest payments and income taxes. Also referred to as operating income, it is calculated as a company's gross income minus all its operating expenses.

Financial Terms and Acronyms (contd.)

EBIT Margin: Ratio that expresses EBIT as a percentage of total sales $(\text{EBIT}/\text{Sales} \times 100)$; also referred to as operating margin.

EBITDA (Earnings Before Interest, Taxes, Depreciation and Amortisation): profit before taking into account interest payments, income taxes and non-cash operating expenses (depreciation and amortisation). It is calculated as a company's gross income minus its cash operating expenses only.

EM (Emerging Market) : is a country that has some characteristics of a developed market, but does not meet standards to be a developed market. This includes countries that may become developed markets in the future or were in the past.

EPS (Earnings Per Share): is the division of total net profit by the number of shares.

EV (Enterprise Value) is a measure of a company's value, often used as an alternative to straightforward market capitalisation. It is calculated as $(\text{market cap} + \text{debt} + \text{minority interest} + \text{preferred shares}) - \text{total cash} - \text{cash equivalents}$.

EV/EBITDA: compares the total value of the company to its EBITDA.

EV/SALES: compares the total value of the company to its sales.

FCF (Free Cash Flow): represents the difference between operating cash flow and capital expenditures and shows the company's ability to generate shareholder's value after laying out the money required to maintain or expand its asset base. Without enough cash, it would be difficult for a company to develop new products, make acquisitions, pay dividends and reduce debt.

FFO (Funds from Operations): measures a REIT's operating performance. It is net income plus gains (minus losses) from property sale and purchase. Non-cash expenses like depreciation and amortisation are added back because value of real estate tends to rise over time rather than depreciating like other fixed assets and investments. FFO per share is often used in place of earnings per share when analysing REITs.

FY1 (Fiscal Year One): refers to the current fiscal year.

FY2 (Fiscal Year Two): refers to the next fiscal year.

FY16E: Fiscal year 2016 estimation, **FY17E:** Fiscal year 2017 estimation

GDP (Gross Domestic Product): is the monetary value of all the finished goods and services produced within a country's borders in a specific time period.

GDR (Global Depositary Receipt): is very similar to an ADR. It is a bank certificate issued in more than one country for shares in a foreign company. The shares are held by a foreign branch of an international bank. The shares trade as domestic shares, but are offered for sale globally through the various bank branches.

GOODWILL: is an intangible asset that arises as a result of the acquisition of one company by another company for a premium value and can have as origin the value of a company's brand name, solid customer base, good customer relations, good employee relations and any patents or proprietary technology.

GROSS INCOME: gross profit calculated as a company's total sales minus its cost of goods sold (COGS) that corresponds to labour and production costs.

GROSS MARGIN: expresses gross income as a percentage of total sales $(\text{Gross Income}/\text{Sales} \times 100)$.

IPO (Initial Public Offering): is the first sale of stock by a private company to the public to expand its growth or, sometimes, repay its debt.

LIKE FOR LIKE (LFL) GROWTH: is a measure of growth in sales, adjusted for new or divested businesses. This is a widely used indicator of retailers' performance. This adjustment is important in businesses that show a significant change through expansion, disposals or closures.

LTV (Loan-To-Value Ratio): is a financial term used to express the ratio of a loan to the value of an asset purchased. The term is commonly used by financial institutions and real estate companies to represent the ratio of the loan as a percentage of the total appraised value of real property.

NAV (Net Asset Value): is similar to book value and is also called per investment unit. NAV is the marked-to-market value of the company's property investments less liabilities.

ND (Net Debt): is calculated as a company's total debt minus cash and other similar liquid assets.

NET MARGIN: is a financial ratio which measures the profitability of the net income of a company. Formula: $\text{Net Profit}/\text{Sales}$.

NI (Net Income or Bottom Line): represents a company's total earnings (or profit) which is calculated by adjusting revenues for the costs, depreciation, interest, taxes and other expenses.

OPERATING MARGIN: See definition of EBIT Margin.

Glossary (2/2)

ORGANIC GROWTH: is the growth rate that a company can achieve by increasing its output and enhancing sales, excluding any profits or growth from takeovers or M&A activities.

P/E or PER (Price Earnings Ratio): reflects the trading price of a share in relation to the expected earnings. Formula: Share Price/Earnings Per Share.

P/TBVS (Price To Tangible Book Value): expresses the share price with regard to the accounting value of the company. Formula: Share Price/Tangible Book Value Per Share.

PAYOUT RATIO: is the proportion of earnings paid out as dividends to shareholders and typically expressed as a percentage. A lower payout ratio is generally preferable to a higher payout ratio. A ratio greater than 100% indicates the company is paying out more in dividends than it makes in net income.

PMI (Purchasing Managers Index): is an indicator of the economic health of the manufacturing sector. The PMI is based on five major indicators: new orders, inventory levels, production, supplier deliveries and the employment environment

PROFIT WARNING: is the announcement made by the company before its earnings release indicating the investors that its earnings would not meet the analysts' expectations.

RWA (Risk Weighted Assets): is a measure of the bank's assets, weighted according to their risk. It involves the risk weighting of both on and off-balance-sheet exposures. It is generally used to calculate risk-based capital ratio which is the ratio of a bank's capital to its risk weighted assets.

REVENUE GROWTH: Illustrates the growth of sales over a given period.

ROA (Return on assets): a financial ratio that is calculated as net income divided by total assets and shows how profitable a company is relative to its total assets

ROC (Return on invested capital): a profitability ratio which is calculated as net income minus dividends divided by total invested capital.

ROE (Return On Equity): The amount of net income returned as a percentage of shareholders' equity. Return on equity measures a corporation's profitability by disclosing how much profit a company generates with the money shareholders have invested.

SHARE BUYBACK (Share Repurchase): A program by which a company buys back its own shares from the marketplace, reducing the number of outstanding shares. It usually indicates that the company's shares are undervalued and pushes the share prices up. **SHAREHOLDER'S EQUITY:** is the amount of the funds contributed by the owners (the stockholders) plus the retained earnings (or losses).

STOCK SPLIT: is a corporate action in which the company divides its existing shares into multiple shares to make shares seem more affordable for small investors without changing the underlying value of the company.

TBV (Tangible Book Value): is the book value excluding intangible assets.

TBVS (Tangible Book Value Per Share): allows to estimate the accounting value of a company by measuring its stockholders' equity per share. Formula: Re-valued Net Assets/Total Shares of Company.

WACC (Weighted Average Cost of Capital): also referred to as the firm's cost of capital, it is the rate that a company is expected to pay on an average to all its security holders to finance its assets.

WORKING CAPITAL: is the difference between a company's current assets and current liabilities and shows whether the company has sufficient short-term assets to cover its short-term debts.

Indices

MSCI AC WORLD: is a free float-adjusted market capitalisation weighted index that is designed to measure the equity market performance of developed markets. The MSCI World Index consists of the following 23 developed market country indexes: Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, the Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, the UK, and the US (as of 2 June 2014).

MSCI AC ASIA PACIFIC: is a free float-adjusted market capitalisation weighted index that is designed to measure the equity market performance of the developed and emerging markets in the Pacific region. The MSCI AC Pacific Free Index consists of the following 12 developed and emerging market countries: Australia, China, Hong Kong, Indonesia, Japan, Korea, Malaysia, New Zealand, the Philippines, Singapore, Taiwan, and Thailand (as of 2 June 2014).

MSCI EUROPE: is a free float-adjusted market capitalisation weighted index that is designed to measure the equity market performance of the developed markets in Europe. The MSCI Europe Index consists of the following 15 developed market country indexes: Austria, Belgium, Denmark, Finland, France, Germany, Ireland, Italy, the Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, and the UK (as of 2 June 2014).

MSCI EMERGING MARKETS: is a free float-adjusted market capitalisation index that is designed to measure equity market performance of emerging markets. The MSCI Emerging Markets Index consists of the following 23 emerging market country indexes: Brazil, Chile, China, Colombia, the Czech Republic, Egypt, Greece, Hungary, India, Indonesia, Korea, Malaysia, Mexico, Peru, the Philippines, Poland, Qatar, Russia, South Africa, Taiwan, Thailand, Turkey* and the UAE (as of 2 June 2014).

MSCI WORLD HIGH DIVIDEND YIELD: is based on the MSCI World Index, its parent index, and includes large- and mid-cap stocks across 23 Developed Markets (DM) countries (as of 31 March 2014). The index is designed to reflect the performance of equities in the parent index (excluding REITs) with higher dividend income and quality characteristics than average dividend yields that are both sustainable and persistent.

MSCI WORLD VALUE: captures large- and mid-cap securities exhibiting overall value style characteristics across 23 Developed Markets countries (as of 31 March 2014). The value investment style characteristics for index construction are defined using three variables: book value to price, 12-month forward earnings to price and dividend yield. With 853 constituents, the index targets 50% coverage of the free float-adjusted market capitalisation of the MSCI World Index.

MSCI WORLD GROWTH: captures large- and mid-cap securities exhibiting overall growth style characteristics across 23 Developed Markets countries (as of 31 March 2014). The growth investment style characteristics for index construction are defined using five variables: long-term forward EPS growth rate, short-term forward EPS growth rate, current internal growth rate and long-term historical EPS growth trend and long-term historical sales per share growth trend.

MSCI WORLD SMALL CAP: captures small cap representation across 23 Developed Markets (DM) countries (as of 31 March 2014). With 4,302 constituents, the index covers approximately 14% of the free float-adjusted market capitalisation in each country.

MSCI WORLD LARGE CAP: captures large-cap representation across 23 Developed Markets (DM) countries (as of 31 March 2014). With 737 constituents, the index covers approximately 70% of the free float-adjusted market capitalisation in each country.

MSCI EMEA: is a free float-adjusted market capitalisation weighted index that is designed to measure the equity market performance of the emerging market countries of Europe, the Middle East and Africa. The MSCI EM EMEA Index consists of the following 10 emerging market country indexes: the Czech Republic, Greece, Hungary, Poland, Russia, Turkey, Egypt, South Africa, Qatar and the UAE.

MSCI LATAM: captures large- and mid-cap representation across five emerging market (EM) countries (as of 31 March 2014) in Latin America. With 137 constituents, the index covers approximately 85% of the free float-adjusted market capitalisation in each country.

MSCI EMERGING ASIA: captures large and mid-cap representation across eight EM countries (as of 31 March 2014). With 537 constituents, the index covers approximately 85% of the free float-adjusted market capitalisation in each country.

MSCI RUSSIA: is designed to measure the performance of the large- and mid-cap segments of the Russian market. With 22 constituents, the index covers approximately 85% of the free float-adjusted market capitalisation in Russia.

MSCI BRAZIL: is designed to measure the performance of the large- and mid-cap segments of the Brazilian market. With 70 constituents, the index covers about 85% of the Brazilian equity universe.

MSCI INDIA: is designed to measure the performance of the large- and mid-cap segments of the Indian market. With 64 constituents, the index covers approximately 85% of the Indian equity universe.

Euro Stoxx 50: is the leading blue-chip index for the eurozone and provides a blue-chip representation of supersector leaders in the Eurozone. The index covers 50 stocks from 12 Eurozone countries. The Index is licensed to financial institutions to serve as underlying for a wide range of investment products such as Exchange Traded Funds (ETF), Futures and Options and structured products.

FTSE 100: comprises the 100 most highly capitalised blue chip companies, representing approximately 81% of the UK market. It is used extensively as a basis for investment products, such as derivatives and exchange-traded funds.

S&P 500: includes 500 leading companies in the leading industries of the US economy. It is a core component of the US indices that could be used as building blocks for portfolio construction. It is also the US component of S&P Global 1200.

Nikkei 225: is the leading index of Japanese stocks. It is a price-weighted index comprised of Japan's top 225 blue-chip companies on the Tokyo Stock Exchange. The Nikkei is equivalent to the Dow Jones Industrial Average Index in the US.

Important Disclaimer (1/2)

Société Générale Private Banking ("SGPB") is a division of the group Société Générale S.A. operating through its head office within Société Générale S.A. and its network (subsidiaries or branches or departments of Société Générale S.A.), located in various countries, hereinafter mentioned, acting under the "Société Générale Private Banking" brand, and distributors of the document.

Subject of the document

The present document has been prepared by the experts of the group Société Générale S.A. and more particularly of Société Générale Private Banking division, to provide you with information relating to some financial and economic data. The name and function of the people having prepared this document are indicated in the first pages of this document.

This document is non-independent research and is a marketing communication. It has not been prepared in accordance with legal requirements designed to promote the independence of investment research and the investment service provider is not subject to any prohibition on dealing ahead of the dissemination of investment research.

In order to read and understand the financial and economic information included in this document, you will need to have knowledge and experience of financial markets.

The content of this document only aims to provide simple information to help you to make your investments or disinvestments decisions, and it shall not constitute a personal recommendation. You keep the liability of your asset's management, and you remain free concerning your investment decisions.

Moreover, the document may mention financial products / asset classes that are not authorized / marketable in certain countries, and / or which might be reserved for certain categories of investors. Therefore, should you wish to make an investment, as the case may be and according to the applicable laws, your advisor within your Société Générale Private Banking entity will check whether this investment is possible within your jurisdiction and whether it corresponds to your investment profile.

Conflict of interest

This document contains the views of SGPB experts. Société Générale trading desks may trade, or have traded, as principal on the basis of the expert(s) views and reports. In addition, SGPB experts receive compensation based, in part, on the quality and accuracy of their analysis, client feedback, revenues of their entity of the Société Générale group and competitive factors.

As a general matter, entities within the Société Générale group may make a market or act as a principal trader in securities referred to in this report and can provide banking services to the companies mentioned in that document, and to their subsidiary. Entities within the Société Générale group may from time to time deal in, profit from trading on, hold on a principal basis, or act as advisers or brokers or bankers in relation to securities, or derivatives thereof, or asset class(es) mentioned in this document.

Entities within the Société Générale group may be represented on the supervisory board or on the executive board of such persons, firms or entities. Employees of the Société Générale group, or persons/entities connected to them, may from time to time have positions in or hold any of the investment products/ asset class(es) mentioned in this document.

Société Générale may acquire or liquidate from time to time positions in the securities and/or underlying assets (including derivatives thereof) referred to herein, if any, or in any other asset, and therefore any return to prospective investor(s) may directly or indirectly be affected.

Entities within the Société Générale group are under no obligation to disclose or take into account this document when advising or dealing with or on behalf of customers. In addition, Société Générale may issue other reports that are inconsistent with, and reach different conclusions from the information presented in this report and is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report.

Société Générale group maintains and operates effective organisational and administrative arrangements taking all reasonable steps to identify, monitor and manage conflicts of interest. To help the Société Générale Private Banking Entities to do this, they have put in place a management of conflicts of interest policy designed to prevent conflicts of interest giving rise to a material risk of damage to the interests of SGPB clients. For further information, SGPB clients can refer to the management of conflicts of interest's policy, which was provided to them by the SGPB entity of which they are clients.

General Warning

This document is subject to modifications and is given for purely informative purposes; it does not constitute a contract. This material has been prepared for information purposes only and is not intended to provide investment advice nor any other investment service and the document does not constitute and under no circumstances should it be considered in whole or in part as an offer, a solicitation, advice, a personal recommendation, nor an invitation to invest in the investment products and/or in any class of assets mentioned herein from any of the Société Générale Private Banking entities.

The information indicated in this document shall not be considered as legal or tax or accounting advice. The analysis made in this document is made as a whole and cannot be dealt with separately.

You should be aware that the investment to which this material relates may involve numerous risks. The amount of risk may vary but can expose you to a significant risk of losing all of your capital, including a potential unlimited loss. Accordingly these products or services may be reserved only for a certain category of eligible investors such as those who are sophisticated and familiar with these types of investment and who understand the risks involved.

Accordingly, before making an investment decision, as the case may be and according to the applicable laws, the potential investor will be questioned by his advisor of his Société Générale Private Banking entity as to his eligibility for the envisaged investment, and the compatibility of the investment with his investment profile and objectives. He should also consult his own independent financial, legal and tax advisers to obtain all the financial, legal and tax information which will allow him to appraise the characteristics and the risks of the envisaged investment, as well as his tax treatment, in light of his own circumstances.

The full understanding and agreement to the related contractual and informative documentation including the documentation relating to the relevant risks is required from the potential investor prior to any investment. The potential investor has to remember that he should not base any investment decision and/or instructions solely on the basis of this document. Any investment may have tax consequences and it is important to bear in mind that the Société Générale Private Banking entities do not provide tax advice. A potential investor should consider seeking independent tax advice (where appropriate). The level of taxation depends on individual circumstances and such levels and bases of taxation can change.

The investment product(s)/asset class(es) described in this document may not be eligible for sale or subscription in all jurisdictions or to certain categories of investors. It is the responsibility of any person in possession of this document to inform to be aware of and to observe all applicable laws and regulations of relevant jurisdictions. This document is not intended to be distributed to a person or in a jurisdiction where such distribution would be restricted or illegal. This document is in no way intended to be distributed in or into the United States of America nor directly or indirectly to any U.S. person.

The price and value of investments and the income derived from them can go down as well as up. Changes in inflation, interest rates and exchange rates may have an adverse effect on the value, price and income of investments issued in a different currency from that of the client. The simulations and examples included in this document are provided only for informational and illustration purposes alone. The present information may change with market fluctuations and views reflected in this document may change.

The Société Générale Private Banking entities disclaim any responsibility to update or make any revisions to this document. The purpose of this document is to inform investors who shall make their investment decisions without overly relying on the document.

The Société Générale Private Banking entities disclaim any responsibility for direct or indirect losses related to any use of this publication or its content. The Société Générale Private Banking entities offer no implicit or explicit guarantees as to the accuracy or exhaustivity of the information or as to the profitability or performance of the asset classes, countries and relevant markets.

The investment product(s)/asset class(es) described herein may be issued by issuer(s) whose credit rating is provided by a rating agency and which can vary. The Société Générale Private Banking entities are not responsible for any risk in respect of such issuer(s) including but not limited to risk of default of such issuer(s).

This document does not purport to list or summarize all of the financial products' terms and conditions, nor to identify or define all or any of the risks that would be associated with the purchase or sale of the financial product(s)/asset class(es) described herein.

The historical data and information herein, including any quoted expression of opinion, have been obtained from, or are based upon, external sources that the Société Générale Private Banking entities believe to be reliable but have not been independently verified and are not guaranteed as to their accuracy or completeness. The Société Générale Private Banking entities shall not be liable for the accuracy, relevance or exhaustiveness of this information. Information about past performance is not a guide to future performance and may not be repeated. Investment value is not guaranteed and the value of investments may fluctuate. Estimates of future performance are based on assumptions that may not be realised, and should not be deemed an assurance or guarantee as to the expected results of investment in such investment products and/or asset class(es).

This document is confidential, intended exclusively to the person to whom it is given, and may not be communicated nor notified to any third party (with the exception of external advisors on the condition they themselves respect this confidentiality undertaking) and may not be copied in whole or in part, without the prior written consent of the relevant Société Générale Private Banking entity.

Potential risks in case of an investment

Risk of loss of the total amount invested, volatility risk, risk linked to small and mid capitalization, credit risk, counterparty risk, issuer's risk, liquidity risk, risk linked to discretionary management, change risk, market risk.
